COURSE OVERVIEW

With increasing urbanization and medical problems amongst working individuals rising, a need for proper nutrition is dire. Dietitians are gaining a lot of importance amongst the urban crowd as the young generation of India is realizing the importance of a healthy diet and value of getting proper nutrients.

Dietetics focuses on food management through proper plan, monitoring and supervision of a patient's diet. On the other hand, nutrition is related to the overall promotion of health by advising people on health and food choices.

Therefore, dietitians and nutrition consultants are earning a lot of money in cities. Hospitals also hire professionals in this field. A lot of corporate companies also hire nutritionists in order to keep their employees healthy and active.

Employability: Healthcare Industry, Nutrition Industry, Sports Arena, Dietetics Industry.

STUDENT TESTIMONIALS

It has been a great experience with AAFT. This one year has completely changed my perception about Nutrition. As my 9 year old says, "nutrition, for the right thing". I have been able to successfully drive my family behavior towards healthy eating. My son before eating outside now questions whether that food has trans fat?". This makes me feel that my 1-year journey with AAFT has been highly successful. It is a learning for a lifetime. Live mentoring has been a big support with quick response and help whenever required made me trust that I am in good hands.

Priyanka Samanta

10th Batch - November 2022

It's my privilege that I got opportunity to attain the knowledge in the field of nutrition and dietetics from such a recognized AAFT university. The Course materials were good, the mentoring approach was good, and working with other people via the Internet was good. The instructor did a good job of communicating and making it a more intimate arrangement. A lot of online courses fail because of the isolation. I learned a lot. Now I find myself empowered.
